# Monensin and Tylosin Medicated Cattle Feed - Coccidiosis Type B Medicated Feed

Caution: Federal law restricts medicated feed containing this veterinary feed directive (VFD) drug to use by or on the order of a licensed veterinarian.

# For Use in Cattle Feeds Only Do Not Feed Undiluted INDICATIONS

For prevention and control of coccidiosis due to *Eimeria bovis* and *E. zuernii* and reduction of incidence of liver abscesses caused by *Fusobacterium necrophorum* and *Arcanobacterium (Actinomyces) pyogenes* in cattle fed in confinement for slaughter.

### **ACTIVE DRUG INGREDIENTS**

ACTIVE DRUG INGREDIENTS	
Monensin, USP <sup>1</sup>	41 to 1600 g/ton*
Tylosin phosphate <sup>2</sup>	
GUARANTEED ANA	ALYSIS
Crude Protein, not less than	%
Non-Protein Nitrogen (NPN) <sup>3</sup> , not more than	
Crude Fat, not less than	
Crude Fiber, not more than	
Calcium, not less than	<sup>0</sup> %
Calcium, not more than	
Phosphorus, not less than	
Salt <sup>4</sup> , not less than	
Salt <sup>4</sup> , not morethan	
Sodium <sup>5</sup> , not less than	%
Sodium <sup>5</sup> , not more than	
Potassium, not less than	
Vitamin A <sup>4,6</sup> , not less than	I.U./lb
<sup>3</sup> When added.	
4If added	

<sup>&</sup>lt;sup>4</sup>If added.

# **INGREDIENTS**

Each ingredient must be named in accordance with the names and definitions adopted by the Association of American Feed Control Officials.

# MIXING DIRECTIONS

Mix 50 to 500 pounds of Type B medicated feed with 1950 to 1500 pounds of a non-medicated feed, respectively to yield a Type C feed with 10 to 40 grams per ton of monensin and 8 to 10 grams per ton of tylosin. It is recommended that Type B feeds containing more than 1440 g/ton be further diluted before mixing in the total mixed ration.

<sup>&</sup>lt;sup>5</sup>Shall be guaranteed only when total sodium exceeds that furnished by the maximum salt guarantee.

<sup>&</sup>lt;sup>6</sup>Other than precursors of Vitamin A.

#### **CAUTIONS**

Do not allow horses or other equines access to feeds containing monensin. Ingestion of monensin by horses has been fatal. Monensin medicated cattle feed is safe for use in cattle only. Consumption by unapproved species may result in toxic reactions. Feeding undiluted or mixing errors resulting in high concentrations of monensin has been fatal to cattle. Must be thoroughly mixed in feeds before use. Do not feed undiluted. Do not exceed the levels of monensin recommended in the feeding directions, as reduced average daily gains may result. If feed refusals containing monensin are fed to other groups of cattle, the concentration of monensin in the refusals and amount of refusals fed should be taken into consideration to prevent monensin overdosing.

Do not use in any finished feed (supplement, concentrate or complete feed) containing in excess of 2% bentonite.

### WARNINGS

A withdrawal time has not been established for pre-ruminating calves. Do not use in calves to be processed for veal.
